

ABLOY® ELO66

Multipoint lock case for profile doors

Product description

ELO66 is a multipoint lock case for profile doors. The lock automatically deadlocks when the door is closed making sure that the door stays locked when needed. The lock can be opened from outside with a key or by the interior handle. The product is a multipoint lock with two additional locking points on top of the actual lock case. This adds an additional level of security to the product as multipoint locks offer better support to the whole door without losing the ease of use compared to the single point lock cases. The product is available in with a u-shape or a flat forend. ELO66 has a 20mm deadbolt which enhances the security of the product. EN179 and EN1125 have been approved for the product meaning that it is suitable for both exit and panic exit doors when assembled according to instructions. These standards make the product suitable for door environments where passing through in one direction must always be possible.

Overview of Advantages

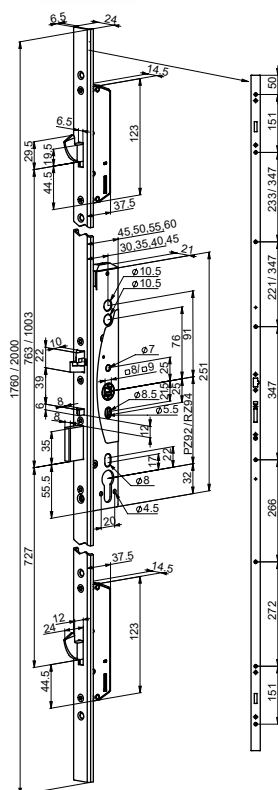

- Mechanical automatic deadlocking system
- EXIT function by inside handle or panic bar
- U- and flat shape face plates available
- Opening direction of the trigger bolt can be selected
- 20 mm deadbolt

Scope of delivery

- Lock case
- Operating manual

Ordered separately

- Handle set (e.g. EH006/0730)
- Cylinder (e.g. CY3211)
- Strike plate (e.g. EA330, EA306)
