SMALL AND ROBUST

The Ultra Mini 410 U-Lock is compact and combines high-quality materials with intelligent locking technology.

What features does it have to protect against theft? A 12mm thick rounded shackle which is made of specially hardened steel - just like the body and structural parts of the locking mechanism. Combined with a high-quality locking cylinder which offers superb protection against tampering such as picking thanks to "double locking", the Ultra Mini 410 U-Lock is a reliable companion when you are out on your high-end bicycle. The lock passed the ice spray test with flying colours.

### Technologies

- Hardened 12 mm round shackle
- The shackle, body and the structural parts of the locking mechanism are made of specially hardened steel
- The special, modern design of the lock body casing allows for optimum handling
- High-quality locking cylinder for a high level of protection against tampering, e.g. picking

#### Operation and use

- Good protection at medium theft risk
- Recommended for securing good bicycles
- The longer the shackle, the easier the bicycle can be locked to a fixed object
