

# Abloy EL402

## Tootekirjeldus

ABLOY EL402 is typically used in the interior doors of business premises and educational buildings. The locks include a special double action bolt for quick and easy use and offer a cost-effective way of electric locking without compromising performance. The locks can be controlled by a variety of electrical impulse generating equipment such as card readers, keypads and timers. The locks can be connected to automatic swing door operators and are an excellent solution for access control systems. The new revolutionary adjustable backset feature offers unique flexibility that's never been available before. Because of its symmetrical trigger bolt, ABLOY EL402 can be used in double swing doors. The lock can always be opened mechanically by key or by thumb turn and the bolt deadlocks automatically when the door closes.

### Key Features:

- Field selectable Fail Safe/Fail Secure configuration
- Non Handed Symmetrical trigger bolt
- Visual Lock Status indicator
- Immediate release of Deadlocking
- Push or Pull operation
- Wide Operating Voltage
- Adjustable Backset Between 25 – 35 to suit most narrow style applications.
