

ABUS 64TI

Tootekirjeldus

The ABUS new generation of padlocks are strong, lightweight and innovative. TITALIUM is based on a special aluminium alloy, a mixture of materials is created that is extremely durable and lightweight; similar to the process used in aircraft construction. This contemporary product implementation is also reflected in the product design – all the locks in the TITALIUM series feature an impressive stainless steel like finish.

Compared to classic brass padlocks, the locks in the TITALIUM series are around 30% lighter but feature the same level of security making them excellent value for money. With a TITALIUM lock body, rust-free internal components and 5 pin tumbler cylinder, a hardened steel double locking shackle, which resists saw attack.

Usability:

- To secure valuables/goods of medium value or at a an average risk of theft

Product Features:

- Paracentric keyway for increased protection against manipulation
- Chrome plated cylinder plugs
- Through hardened shackle
- Double bolted from
- Solid lock body made from TITALIUM aluminium alloy - Higher security, less weight
- Special alloy steel shackle with NANO PROTECT coating
- Inner components made from non-corrosive materials

- Precision pin cylinder
