Steel-O-Flex AB08 Centuro 860/110	50,00 € (ainult ühes laos)	67,04 €

cable - made from 8 mm thick material with a special structure in which the steel cables are wound around each other and encased in a protective sheath. This makes the cable lock extremely flexible, which encase the inner steel cable and thus provide double security. This makes it much more difficult to cut the cable than with a simple cable lock. We recommend using the Steel-O-Flex™ Centuro 860 primarily for securing good bikes and as protection in areas with a medium risk of theft.
