<p> 1. Social media platforms like Facebook, Twitter, and YouTube have become breeding grounds for hate speech and misinformation. 2. The anonymity provided by the internet allows individuals to express their prejudices and engage in cyberbullying without facing consequences. 3. The rapid spread of false information can lead to panic and social unrest, as seen in the case of the 2011 London riots. 4. The digital divide, where certain groups lack access to the internet, exacerbates social inequalities and limits their ability to participate in the digital economy. 5. The constant connectivity of the internet can lead to increased stress and mental health issues, as individuals are always "on" and exposed to a constant stream of information. 6. The rise of fake news and clickbait websites has eroded trust in traditional media and government institutions. 7. The digital world has created a new space for organized crime, including cyberstalking, identity theft, and the sale of illegal goods and services. 8. The pressure to maintain a perfect online image can lead to mental health problems, particularly among young people. 9. The digital revolution has led to the loss of jobs in traditional industries, while new jobs in the tech sector often require skills that many workers lack. 10. The digital world has created a new space for organized crime, including cyberstalking, identity theft, and the sale of illegal goods and services. </p>	<p> 1. Forcefield multiphysics simulation (Chapman 2008, 2010) to prototype the ABS Locking Technology. In it, steel cables characterised by 25 high-tensile cold-chambered and spatially hardened steel sleeves. On the very outside, a synthetic fibre coating protects the bike from damage to the paintwork when unlocking and locking the lock.
