

Võutmete lõikamismasin Keyline Dezmo

Tootekirjeldus

- Dezmo is an innovative machine that defines a new technological standard for the duplication of door and car cylinder keys.
- The cutting results are precise and of outstanding quality in both code and copy duplication.
- Dezmo works with a proprietary software and database, but is open to the main standards in master systems management.
- The five colour touch screen provides all the necessary information for the correct cutting of keys, guaranteeing a high degree of safety for the operator.
- Easy to use and its software can be easily updated through both USB key and online.
