Tootekirjeldus

The ekey power supply outlet-mounted supplies ekey devices with the electrical power they need, with an input voltage of 230 VAC, an output voltage of 12 VDC, and an output current of 2 A. This power supply is intended for use in both domestic and business applications. The ekey power supply outlet-mounted is designed for fixed flush-mounting installation on immobile components, such as flush mount back boxes, and for use in protected interior areas.
