

ABUS Diskus 24

Tootekirjeldus

The 24 sets the standard by which all other disc locks are judged, and we have found no other lock that comes close. It is both stronger and harder to defeat than any other disc lock. The 24 is made from all non-corroding components, and is designed for extreme weather conditions. These locks come with 100% stainless steel protection; the shackle, lock body and internal components are all made of high quality stainless steel. This lock has a key retaining feature that prevents removing the key while the padlock is unlocked. The round lock body protects the shackle which makes the disc lock extremely hard to defeat.

- Original Diskus-design: 360 degree protection
- Stainless steel inside and out
- 100% non-corrosive shackle and internal components
- Diskus deep welding technology for maximum strength
- Anti-cut plate
- Precision pin tumbler cylinder that is extra plated for ultimate corrosion resistance
