

ABUS Granit 37RK/60

Tootekirjeldus

ABUS Granit padlocks meet these demanding standards and are therefore considered to be among the most secure padlocks in the world. Their pinch or tensile resistance is over 6 tonnes. High-quality materials and careful finishing are the basis for the quality of these padlocks that are made in Germany. 2 keys supplied, one with LED Torch. It has a black Granit coating for optimal corrosion protection are characteristic of these padlocks.

ABUS Plus greatest resistance

The ABUS Plus lock system is one of the special features of the Granit range: this high-security locking system provides the greatest resistance to "intelligent" attempts at entry, such as lock-picking and manipulation. The immense amount of time required to open padlocks in this way makes the ABUS Plus locking system one of the most secure in the world. The Granit range can be combined with strong chains, e.g. to protect a valuable motorbike or expensive building equipment.

Usability:

- To secure valuables/goods of greater value or at a high risk of theft
- To secure e.g. warehouses, industrial sites, factory gates, containers and lorries

Product Features:

- Available Master Keyed
- All supplied with Key Code Card for easy key identification and duplication

- 250,000 key differs
- Body and shackle made from hardened alloy steel
- RK: cylinder can be re-keyed to match an existing key
- Constructed and tested according to CEN-class 4
- Meets special requirements of insurance companies
- ABUS-Plus disc cylinder: highest protection against manipulation
- Black Granit coating for even more corrosion resistance
