

ABUS 130/180

Tootekirjeldus

Sometimes a hasp must be fitted so that a padlock can reliably secure your valuables - for example, if there is no possibility of hanging a padlock in one place. To secure larger value assets or if there is a high risk of theft, the granite hasp 130 is a very good solution. It was specially developed for combined use with ABUS Granit padlock 37/55. The hasp is made of robust malleable cast iron, which makes it very resistant to attempts to break it open and to climatic conditions. It also has two hardened hinge pins with swing guards and hardened staples. If the hasp is mounted, the screws are concealed. This way, the hold-up offers little attack surface for attempted break-ins.

Technologies:

- Two hardened concealed hinge pins
- Tough whiteheart malleable iron
- Hardened staple
- With anchor plate and accessories
- Hidden screws
