

TOOTENIMETUS	SOODUS	HIND
<p>generally used on painted metal doors (for example garden gates, cellar doors and similar) from Hasp ABUS 200/115, but a padlock cannot simply be hooked in, we recommend ABUS hasp 200.7. Thanks to the hardened steel eyelet and the concealed screws, which offer hardly any attack surface, breaking open is significantly more difficult.</p>
