ABUS Centuro 860 Armored Cable Lock

ABUS bike lock makes it especially difficult for bike thieves to steal. The Steel-O-Flex™ Centuro 860 spiral cable lock consists of 20 mm thick, overlapping steel sleeves made of specially hardened steel, which encase the inner steel cable and thus provide double security. This makes it much more difficult to cut the cable than with a simple cable lock. We recommend using the Steel-O-Flex™ Centuro 860 primarily for securing good bikes and as protection in areas with a medium risk of theft.

Features of ABUS Centuro 860 Armored Cable Lock:

- Good protection for medium theft risk
- 20 mm thick, overlapping steel sleeves protect the internal steel cable
- Plastic coating to protect against damage to the paintwork
- The steel sleeves as well as supporting parts of the locking mechanism are made of specially hardened steel
- Due to the steel sleeves, Steel-O-Flex™ locks achieve a significantly higher level of security than simple cable locks while still maintaining a high level of flexibility (double protection)
- Security Level Bike 7/15
