ABUS Iven Steel-O-Flex 8200 Armored Cable Lock

Cable locks are popular because of their high flexibility. The ABUS Steel-O-Flex™ Iven 8200 is similarly flexible, but offers more protection. This is made possible by innovative Steel-O-Flex™ technology: The steel cable is covered by 25 mm thick, overlapping and specially hardened steel sleeves. On the very outside, a synthetic fibre coating protects the bike from damage to the paintwork when unlocking and locking the lock.

The lock body is also a frequent target of theft attacks. The Soft Case Technology of the Steel-O-Flex™ Iven 8200 makes the lock particularly impact-resistant. It protects the ABUS locking cylinder installed in it, which is characterised by high resistance to manipulation attempts.

Features of ABUS Iven Steel-O-Flex 8200 Armored Cable Lock:

- Good protection with low risk of theft
- 25 mm thick, overlapping steel sleeves protect the internal steel cable
- Sheathing offers very high protection against abrasion and does not absorb liquids, e.g. water or oil
- Functional, durable and highly flexible synthetic fibre sheathing protects against paint damage
- The steel sleeves, the housing and supporting parts of the locking mechanism are made of specially hardened steel
- High-quality locking cylinder with user-friendly reversible key for high protection against manipulation, e.g. picking
- Two keys included

- Security Level Bike 8/15
