

A black, flexible, looped security cable with a combination lock. The cable is coiled into a large circle. The combination lock is located at the bottom of the loop and features three rows of numbers: the top row shows '4 4 4 4', the middle row shows '5 5 5 5', and the bottom row shows '6 6 6 6'. The cable has a textured, ribbed appearance.

Tootekirjeldus

The lightest in the Steel-O-Flex family, the Tresor 6615C features 15mm overlapping steel shells that protect the inner steel cable. This lock is best suited to low theft risk areas and is best used as a versatile theft deterrent and for quick stops.

The ABUS 2k Combination Dial is made of two distinct materials - the numbers aren't simply painted on - so your combination digits will never rub off and you'll have a lifetime of readability.

Nobody likes complicated installation and the 6615C takes it to the absolute next level of easy with its innovative SCMU bracket. It can be mounted to the bike without the use of tools in just seconds - saving you valuable time and effort. It rotates to allow the bracket to be mounted in multiple directions and easily accommodates a wide variety of frame shapes and sizes.

The lock is PVC-coated with an attractive matte finish that protects your frame's paint.

- 15mm overlapping steel shells protect the inner steel cable
- PVC coating protects the frame
- 2K Combination Dial for lifelong readability
- Innovative SCMU bracket makes mounting and transport a snap!
